2.01 Residential Districts

The purpose of all residential zones is to promote a suitable environment for residential life through the provision of recreational, religious and educational facilities as basic elements of a balanced neighborhood, to stabilize and protect the essential characteristics of existing residential development, and to foster development that is compatible with the other natural and built characteristics of the area.

R-LD Low Density Residence

The purpose of the R-LD District is to provide for residential areas that allow limited development, while providing protection for environmentally sensitive areas, agricultural resources, and other similar lands. To this end, this is the lowest density residential district.

R-F Fraternity Residence

The purpose of the R-F District is to provide for residential areas dedicated to the specific residential requirements of fraternities, sororities and similar residential facilities associated with educational institutions. To this end, uses other than sororities, fraternities and the like are restricted in this district.

R-O Outlying Residence

The purpose of the R-O District is to provide for lower density residential areas. In general, the R-O District is intended to be a transitional area between the low density R-LD District and medium density R-N District.

R-N Neighborhood Residence

The purpose of the R-N District is to provide for residential areas of medium densities. In general, the R-N District is appropriate for lands adjacent to higher density residential districts, near arterial or primary residential streets, or in areas transitional between the lower density districts and other districts

R-VC Village Center Residence

The purpose of the R-VC District is to provide for residential neighborhoods, within and adjacent to village centers, that are of medium densities and that allow a limited mix of residential and office uses. The R-VC is, in general, intended to provide for a transition between the Business Village Center District and surrounding residential districts.

R-G General Residence

The purpose of the R-G District is to provide for residential neighborhoods of medium to higher density in areas both near the Town Center and between the University and the Town Center. Such areas are convenient to the services, facilities, institutions and/or employment opportunities provided in the Town Center or by the University.

PURD Planned Unit Residential Development

The purpose of the PURD District is to provide for a mixture of housing types and open space, with variations in dimensional requirements, in appropriate areas within the Town, at greater densities than would otherwise be allowed by the underlying zoning. The PURD is an overlay district. The requirements of this District are intended to encourage design of creative development, protection of the natural resources, and compatibility with surrounding areas.

2.02 Business Districts

B-VC Village Center Business

The purpose of the B-VC District is to provide areas within the village centers of Amherst that allow for a mix of uses, including retail, commercial, office and housing of moderate to high density.

B-L Limited Business

The purpose of the B-L District is to provide areas for moderate density, office, commercial and multifamily developments. It is intended to be located in transitional areas between high density business districts and high density residential districts or in appropriate areas along arterial or primary roads.

B-G General Business

The purpose of the B-G district is to provide for a mixed use area, of high density, containing a wide variety of commercial, office, residential, institutional, civic, and cultural uses. To this end, it is intended that this district be applied within the Town Center of Amherst.

OP Office Park

The purpose of the OP District is to provide areas for office and limited research activities. To this end, the standards and regulations are intended to limit the types of uses and to provide for a clean, open and quiet environment that will not adversely impact adjoining residential areas.

COM Commercial

The purpose of the COM District is to provide areas for a wide range of retail uses and services and commercial activities in appropriate locations along primary roads within the Town.

2.03 Industrial/Research Park Districts

PRP Professional and Research Park

The purpose of the PRP District is to provide an open and attractive environment for office, research and low intensity industrial activities. The standards and regulations are intended to limit development to those activities that are non-commercial in nature and that operate in a clean and quiet manner.

LI Light Industrial

The purpose of the LI District is to provide areas for certain light manufacturing, warehousing, wholesaling and similar activities.

2.04 Educational Districts

ED Educational

ED zoning allows any use of land and buildings which may legally be carried on by, or under the auspices of, the college or university which owns or manages the property. It is intended that the Educational District only include land which is owned or managed by Amherst College, Hampshire College, or the University of Massachusetts.

2.05 Resource Protection Districts

FPC Flood-Prone Conservancy

The FPC District consists of those geographical areas which by virtue of their relationship to components of the natural hydrology of the Town of Amherst, have substantial importance to the protection of life and property against the hazards of floods, erosion, and pollution and in general are essential to the public health, safety, and welfare. To this end, the number and types of uses allowed are restricted.

WP Watershed Protection

The WP District is an overlay district intended to provide additional protection to those lands which by virtue of their location, slope and soils, make up the watersheds of the public water supply.

AP - Aquifer Protection

The AP District is an overlay district intended to provide additional protection to those lands which constitute the discharge area for the Lawrence Swamp Aquifer. The AP District does not include such land already zoned FPC.

ARP - Aquifer Recharge Protection
